## **Netball Courts**

Landscape Strategy

Existing gated access from Townley Road retained

Meadow strip sown and plug planted along access path using native species suited to sunny / open conditions

Clusters of mixed tree species planted to enhance biodiversity and resilience of tree population

Existing path widened for emergency access and re-surfaced with hoggin

Existing netball courts to be refurbished

Existing trees retained and protected

Existing hedgerow retained with new infill planting using mixed native species to enhance biodiversity and screening. Hedgerow underplanted with field boundary meadow mix to create additional habitat.

Larger meadow areas created for biodiversity and to support school curriculum
