

Gender Pay Gap Report 2022

Introduction

As an employer with over 250 employees Alleyn's is required to publish an annual Gender Pay Gap report in line with government legislation. Gender Pay Gap reporting differs from Equal Pay Statistics, which assess male and female remuneration for the same job.

Here, we report our figures relating to the 2022 period.

Headlines

Of all the figures published, the most often cited is the **mean average** gender pay gap figure.

Using this measure, the gender pay gap at Alleyn's is 10.3% in favour of male staff members. This compares to a national average figure of **15.4%** in favour of male employees.

Median bonus gap	0%	-20%	-100%	0%	0.00%	-43.75%

(Honorary payments are typically paid to staff who take on an additional area of responsibility for a temporary period of time.)

Narrative

- As an organisation we have significantly more female staff (301) than male staff (161), and moreover there are areas of the School that are predominantly made up of female or male staff.
- Honorary payments normally apply to a very small number of employees. However in the current year reported a large number of honorary payments were made to staff in response to the pandemic.
- The existence of a gender pay gap in any place of employment may be caused by a number of factors. In the case of Alleyn's we aim for these factors to be:
 - Identified
 - Where possible, removed
 - If not removed, then mitigated against, and
 - Highlighted to ensure our practice is regularly reviewed and refined
- Discussions on Alleyn's annual Gender Pay Gap figures will continue to take place at Governor and Staff Meetings. However our Diversity & Inclusion Leads will be responsible for scrutinizing the data and making recommendations to SMT.

Summary

As a co-educational and progressive school, we are naturally concerned with matters of equality.

We are prepared to challenge and question ourselves, others and the status quo when considering employment issues.

We will continue to analyse our gender pay gap figures to identify trends, and to take appropriate and reasonable steps to address any issues that we might uncover.
